	۲	S-Video	

5. Valitse "S-Video"

Transfer Video to Computer	Recording Quality • Very high Suitable for digital archiving of video recordings. Memory consumption approx. 2.1 GB per hour. • High Consumes less memory. Image problems may result from compression anyway.
The screen shows the v A click on "Transfer	ideo signal of the connected analog device. Video to computer" starts the recording.
	Automatic Scene Recognition

6. Varmista, että Recording quality on "Very high" ja filmimateriaali on alussa. Jos kaikki on kunnossa Valitse "Transfer Video to Computer" ja anna videon pyöriä loppuun asti. Kun video on valmis. Valitse "Start video editing"

7. Tässä valikossa voit klipata videota haluamastasi kohdasta siirtämällä punaisen viivan haluamaasi kohtaan ja painamalla saksi nappulaa. Saa niitä muitakin effektejä kokeilla :)

8. Paina "Finish movie" kun olet valmis.

Burn to disc

Burn your movie onto a blank DVD or Blu-ray. It will be playable on any conventional DVD or Blu-ray player.

Save on computer Save your movie as video file on your computer. You may watch it directly on your computer or burn it later.

9. Valitse minne haluat Videon päätyvän.

Olet valmis!
